BELLISSIMA

Siberian Irises

In late spring and early summer, these graceful, beardless, 2-5" flowers provide a wonderful visual display as they float atop mounds of narrow, grasslike foliage that stays attractive all summer. They're easily grown in full sun or light shade and humus-rich, moist, slightly acidic soil, rapidly forming large clumps. Deep root systems make them tolerant of both dry and boggy conditions. Hardy in Zones 3-9. Space 24-36" apart when planting. We ship large, bare root divisions.

About Our Plants

PERENNIALS SHIPPED IN SPRING may be sent as dormant, top size, bare root plants (with no soil around the roots) or as plants grown in pots. Symbols at the end of the plant descriptions denote whether the plant is sent potted (PP) or bare root (BR). On rare occasions, we have to substitute an alternative size. Plants that have been grown in pots may show little or no green growth on arrival, but will quickly leaf out in warm temperatures.

ALL PERENNIALS SHIPPED IN SUMMER will be sent as well-established potted plants.

GROWING INSTRUCTIONS are included with each order, explaining the care needed from the moment your plants arrive.

Shipping Information

SPRING SEASON: We ship to your area when weather conditions are favorable for planting. Due to danger of freezing in transit, plant material will not be shipped before March 1. Spring shipping ends around June 10.

SUMMER SEASON: We begin accepting orders for the summer shipping season in early July. We resume plant shipments in August, and continue until early October. For current availability, go to rootsrhizomes.com or call 920.326.3307.

We try to combine orders into as few shipments as possible, but your order may arrive in more than one shipment. Unless otherwise requested, supplies will be shipped with plant material.

Our Guarantee to You

Your satisfaction is important to us. If there are issues with the products you receive, please keep all contents and packaging, and contact us within 72 hours. We reserve the right to request photos of the item(s) in question or the return of any product(s) deemed unsatisfactory prior to the approval of any adjustments.

A credit voucher in the amount of the purchase price, less shipping charges, will be issued one time for plants that fail to grow, provided they have been properly planted and cared for. **FOR SPRING SHIPMENTS,** we must receive notice of plants that fail to grow within 90 days of receipt of those items. **FOR SUMMER/FALL SHIPMENTS,** we must receive notice of plants that fail to grow by June 1 of the following year. Plant material purchased at 35% off or more is not guaranteed, nor are plants lost due to weather conditions, poor winter protection, neglect, disease, pest damage or other conditions outside of our control.

Gardening supplies are satisfaction guaranteed against material and workmanship defects and may be returned for a replacement or refund within 30 days of receipt of the item(s).
